

Tinnitus/ Hearing Impairment/Healthy Veterans

Category

Other

Enrollment Closing Date

Oct 28, 2018

Description

Drs. Pia Heppner, Dawn Schiehser, and Catherine Ayers are conducting an assessment study to better understand the cognitive and psychological correlates and impact of tinnitus (ringing in the ear(s)) and hearing impairments.

Requirements

Veterans (men and women) ages 18 - 85 years old with tinnitus and/or a hearing impairment(s), OR healthy veterans without these issues. Participate in a one-time, 3.5 hour assessment.

Benefits

None at this time. Your participation may help to inform treatment options for tinnitus.
