

Adapting Virtual Reality Technology for the Treatment of Phantom Limb Pain

Category

Other

Enrollment Closing Date

Sep 1, 2018

Description

In the current study, the research team will develop a virtual reality treatment for phantom limb pain (PLP) that attempts to simulate and improve the benefits of traditional mirror therapy – the gold standard behavioral treatment for PLP. Participants will help shape the virtual reality treatment through their feedback.

Requirements

To be eligible, you must be a Veteran, Ages 21-75, with a lower extremity amputation experiencing phantom limb pain.

Benefits

Participation may help manage symptoms of phantom limb pain.
