**Description**
This study is to find out more about how inflammation, or the immune system’s response to injury or infection, may affect the brain and cognition in patients with schizophrenia. This study involves two possible visits: (1) Clinical questionnaire and medical history screening session and (2) Cognitive testing, MRI scan of the brain, and blood draw.

**Requirements**
*Schizophrenia or Schizoaffective Disorder
*18 to 55 years old
*No other current mental disorder

**Benefits**
*You may receive up to $130 for participating.

**Contact Information**
*Name*  Tanya Nguyen, Ph.D.
*Phone*  (858) 552-8585 x5592
